Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lucast USPN 6198016 in view of Yam 615547.

As to claims 1-6 and 8-14 Lucast discloses an aqueous solution for use in an ostomy pouch (see abstract, col. 2, lines 1-3; col. 11, lines 59-67). The solution contains a cellulosic lubricating agent or polymeric lubricating agent (col. 11, lines 39-57), water-soluble complexing agent (col. 17, lines 33-47), and a surfactant (col. 24, line 45). Lucast does not disclose a deodorizing component. However, Yam discloses a aqueous solution for use as a deodorant in an ostomy appliance (Abstract, col. 3, lines 17-22; col. 13, lines 40-50). It would have been obvious to one having ordinary skill in the art to modify the solution of Lucast with a deodorizing component for the benefit of reducing odor in the ostomy appliance. One of ordinary skill in the art would be able to determine through routine experimentation the amount of each component necessary for effective lubrication and deodorizing functions. Yam/Lucast discloses various agents may be added to the solution (Yam col. 13, lines 47-50; Lucast col. 17, lines 33-46).

3. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lucast USPN 6198016 in view of Yam 615547 and further in view of Maurer USPN 6200939. Lucast/Yam disclose the present invention substantially as claimed. However, Lucast/Yam do not disclose a water-soluble complexing agent from the claimed group of materials. Maurer discloses a complexing agent comprising monocopper citrate for the benefit of providing odor elimination which reacts with odorogenic molecules to reduce malodors rather than merely masking odors (col. 5, lines 3-31). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the solution of Lucast/Yam with the claimed complexing agent for the benefits disclosed in Maurer.
